

Team Hoyt, a father son racing team, has been taking part in races since 1977. Dick & Rick Hoyt have had a tremendous influence among runners & triathletes all over the U.S. and are continuously inspiring people to face adversity. Connecticut Rubber Molding has helped play a role in their success by using their design expertise & knowledge to reconfigure Rick's bike seat, allowing Dick to assemble with ease. Dick struggled with this process for years & we were able to reduce set-up time from 1 hour down to 4 minutes. We are proud to have given back to the community & helped this team do what they do best.
